

AllAboutSims.net introduces itself.

Sulsul Simmer,

we are a motley crew of crazy designers and make for you all kinds of interesting things. But that's not all. We aim to be the friendliest and most helpful forum in the Sims world. With us no help-seeker is rejected. We try every question and to solve no matter how difficult.

If that happens already known who is right. We were called formerly Sims3Community. However, there were some changes. Therefore, we ask ourselves just in front again.

A little unique is our hardware and software support. But this is somehow not the only kind. In light considered each small file is unique in our download base. And these are now quite a lot. On top of these unique got constantly increase.

For this the team of AllAboutSims.net ensures.

In the forefront, our Admin King Leo. Responsible for the forum and also in the creative area at home. King Leo is also responsible for the technical support of our members.

This is followed by the Supermods.

Here we find Cayami, a good master builder and mesher.

Group three, the mods.

Here is Angus Hudson. Do not be surprised if he is not very talkative. He is just a forum bot and not a human being. He has various tasks that relieve the actual team. Then there is Thamira who builds beautiful houses.

This brings us to group four, the designers.

Here we find Abuk0, who supplies us with magical and imaginative things over and over again and TitusLinde, who creates her own things in addition to filmmaking.

Now, the group five is missing. The news reporter.

This position is currently vacant. If you are interested: bewerbung@allaboutsims.de

It still lacks the sixth group. The guest designer.

There is an area for creative minds from all over the world. In this group designers can come who just feel comfortable with us and want to share their things with us. Here are currently ArcticWolf from California / USA, Lucy from Soul of Sims and Ravenai from Ireland.

The seventh group represent the filmmakers.

In cooperation with Simatography we offer Sims Machinima creators and those who want to be there, a German-language platform. Here are Anches, Eduardo Castellinne, Titus Linde, Laura Sims and Ravenai active.

Finally, the largest group, the User.

Without them it would not a community. Many of our users tinker even itself and put their stuff in our Exchange to introduce it.

What do you get everything with us?

Since one can only say a lot.

There is detailed information on all Sims games for each playing member. Therefore we help each member of any kind of problems. This starts with game-related topics and ends to the 1:1 support for computer problems of all kinds. In the forefront our team each of our members with advice and act stands to the side. But also the members helping members. Otherwise it would be not a community. This ultimately means community and nothing else, we want to be.

And with the change of the Forum on UTF8 we can also help our members speaking different languages more easily. The forum was largely quadrilingual designed to make it easier international users to navigate. The interface is available in English, German, Russian and French. In the forum itself only English is used in addition to German. But in an emergency it works well with all what the translating program else will bear.

We have a lexicon in which you will find information about the game. In addition, you will also find information about creating objects plus general information about the computer.

For those members who are interested in creating their own content itself, there are plenty of detailed tutorials. And every question receives an answer. Nobody stays in the rain!

There is a special area for role players. There Role playing with Sims can take place in a protected environment.

ALL ABOUT SIMS

In addition, there are very simple ways to help us financially. In addition to direct donations via PayPal, Paysafecard or bank transfer, there is a new rule that access to our Filebase donors is reserved.

But only a donation of 5, - €per year is necessary. This is certainly not too much to ask, because this sum can afford each student of the pocket money. After all, running a forum not only costs a lot of work, but also money.

But the main reason is the common practice of downloading files and uploading them elsewhere and spending them as your own creations. That is why this regulation was introduced.
